Period	The MAILING DATE of this communication app for Reply	ears on the cover sheet with the c	orrespondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 10/686,105

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-11 are again rejected under 35 U.S.C. 102(e) as being clearly anticipated by Ghabra et al (Pub. No. 2003/0179085 A1).

As per claims 1-11, the reason for the rejection based upon the Ghabra et al reference as set forth in the last office is maintained and incorporated herein by reference.

3. In the amendment, applicant merely alleged that "the Ghabra et al reference discloses a controller that can instruct the tire monitors to independently detect and transmit tire pressure signals a plurality of times at a rate that increases with increasing vehicle speed in response to a single instruction signal from the controller and this contrasts with the presently claimed invention which required that the transponders (in each tire) detect and report tire status in response to each request signal". Applicant's allegation has been fully considered but it is without merit. Firstly, the alleged feature that the transponder in each tire detects and reports tire status in response to each request signal (emphasis added) has not been specifically recited in the claims. Further, there is no disclosure in the Ghabra et al reference that the tire monitors therein transmit tire pressure signals a plurality of times at a rate that increases with increasing vehicle speed in response to a single instruction signal from the controller (emphasis added) as alleged.

Art Unit: 3661

Contrary to applicant's allegation, the Ghabra et al reference in section 0037 explicitly states that the transmitters are configured to transmit tire pressure signals only (emphasis added) in response to activation of initiators by the controller and as such it clearly teaches that the transmitters (or transponders) detect and report the tire pressure status in response to each request signal as required in applicant's argument.

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Chin whose telephone number is (703) 305-9751. The examiner can normally be reached on Monday-Friday 8:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas G Black can be reached on (703) 305-8233. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
